## Feedback Analysis

In this situation of a global health crisis, the virtual system of learning has proved its merits. As the technology advances, this system is here to stay. But, accepting the virtual method doesn't mean rejecting the traditional classroom pedagogy. The convenience and low-cost model of virtual learning.

The virtual learning and classroom lessons have their own importance. In these times of pandemic, virtual learning is more important so that the education of students is not hindered.. They are able to learn new skills and upgrading themselves. Thus, both forms of teachings have their own place.
